Fischer Scientific Education Invites Skol to display Green Roof Model at Science Teacher show in Phoenix

Skol Manufacturing Company will proudly display the [Assemble& Learn Green Roof Model](#) at this year's [National Science Teacher's Association 2009 Area show in Phoenix](#).

The liaison with [Fischer Scientific Education](#) is largely due to Skol's recent partnership with [Eisco Labs](#), a global distributor of science supplies to schools all over the world. As a result, Skol has been able to meet with Fisher's buying team.

"We are fortunate that John (John Bungo, Eisco's US president) is so close with the decision makers at Fischer Scientific Education. His enthusiasm for the model has been more than we hoped for when we created the product. The feedback from the show will give us a good indication of teachers' interest in using the model to educate their students on green building technology," said Andrew Shykofsky, Skol's Director of Business Development.

The show runs Dec. 3-5 at the Phoenix Convention Center where attendance is expected to exceed 1000 educators and speakers.

Skol Manufacturing Company is based in Chicago, Illinois and services clients all over the country making metal parts in cold rolled steel, galvanized steel, stainless steel and aluminum. We also fabricate custom work in bronze, brass and copper, Skol is a sheet metal fabrication business specializing in custom lighting fixtures for commercial and institutional applications, electronic cabinets, chassis, and construction parts. In addition we fabricate precision parts for OEMs, electrical applications and traditional job shop custom work from client provided drawings and blue prints.
