Skol's Bus. Dev. Director becomes Certified in Green Roof Installation

Andrew Shykofsky, Director of Business Development at Skol received notification today that he has successfully passed the [Green Roof Professional certification exam](#) offered last month in Chicago. Although the accreditation is relatively new within the industry, the program developed by Green Roofs for Healthy Cities based in Toronto, Ontario is well respected and considered a credible marker for a person's knowledge in the field.

[Green Roofs for Healthy Cities](#), a rapidly growing not-for-profit industry association working to promote the industry throughout North America designed the Green Roof Professional (GRP) designation to enable professionals to differentiate themselves in the market place, increase customer confidence in green roof technology and protect the industry from inferior installation and maintenance practices.

"We knew Andrew was studying regularly for the exam. He attended the [\(GRHC\) Boot Camp](#) in the spring and has been focused on learning the material ever since. We're very happy for the news," said Juanita Figueroa, CFO at Skol.

Skol Manufacturing Company is based in Chicago, Illinois and services clients all over the country making metal parts in cold rolled steel, galvanized steel, stainless steel and aluminum. We also fabricate custom work in bronze, brass and copper, Skol is a sheet metal fabrication business specializing in custom lighting fixtures for commercial and institutional applications, electronic cabinets, chassis, and construction parts. In addition we fabricate precision parts for OEMs, electrical applications and traditional job shop custom work from client provided drawings and blue prints.
